## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and apparatus for generating image values of an output image. The closest prior art, Suzuki (USPN 5,825,917), shows a similar system, in which, image recognition, extraction, and data compression is carried out on the basis of colors, wherein a judgment section for judging a color difference between a color of each pixel constituting an image and each element of a color table, an image replacement section for replacing in accordance with the result of judgment, the color of each pixel with an element, among elements of the color table, which minimizes the color difference relative to the color of the each pixel; and a pixel integration section for integrating the adjoining pixels after the replacement, if colors of pixels positionally adjoining in an original image are contained in regions adjoining in a divided color space, wherein a single color replaced with an element of the color table is imparted to a group of pixels integrated by the pixel integration section. However, Suzuki fails to address:

"for wherein a color look-up table is provided for a source image, all color values of the source image being in the color look-up table, a reference used for image locations in a particular group of a pixel map being constructed from at least one reference to the color look-up table which defines the color value in the source image for at least one image location in the particular group". This distinct feature has been added separately to all independent claims and render them allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
